For the 21<sup>st</sup> Century”**

### **Today's Army Reserve**

The new Army Reserve has a larger role to play. That new role requires the Army Reserve to deploy and get into the fight much quicker. This is accomplished using a “train-alert-deploy” transformation model that reduces deployment times by weeks.

**The latchkey to the success** of this model is an Army Reserve that is tactically and technically well trained *before* the Alert Phase. As always we depend on the individual Soldier's skills to assure our Army remains the best in the World.

**To accomplish this feat** we require new and innovative approaches to training. Tomorrow's institutional training processes teamed with better USARC Hands on Training (HOT) Military Occupation Specialty Qualified (MOSQ) Readiness Training will provide Campaign Quality Army Reserve Soldiers ready to meet tomorrow's mission sooner.

### **The Answer is HOT**

What is the 63D Hands-On-Training (HOT) Mission Program?

*The 63D RSC* provides quality logistics MOSQ Sustainment Training to Army Reservists and logistics skill refresher training for Army Civilians on an area or regional basis.

**The 63D RSC utilizes** AMSAs and ECSs located throughout their area of responsibility, a Center of Excellence (CoE) located at N. Little Rock, AR and the USARC San Antonio Refurbishment Center (SARC) to provide “Real-World” Two Level Maintenance, Supply, Allied Trades and Transportation HOT Opportunities.

**All HOT training opportunities** have been loaded on the Army Training Requirements and Resources System (ATRRS) using school code 930A for easy scheduling and resourcing.

**Training is documented** on a DA Form 5165R

### **How do I participate in the Program?**

Contact a 63D RSC HOT Coordinator or an AMSA or ECS Site Manager.

### **Training Opportunities**

*63D RSC AMSA & ECS Sites* offer soldiers opportunities to perform in their MOS with a skilled and knowledgeable Military Technician by their side. Most common MOSs that receive training are Wheel/Track Vehicle, Ground Power, Engineer Equip, Weapons Repair mechanics, Motor Transporter Operator and Automated Supply Specialist.

### **N. Little Rock, AR Center of Excellence**

**(CoE)** Conducts HOT courses that supports Soldier and Mil Tech sustainment training requirements. Courses offered at the COE are:  
-Automotive Refrigeration Training with EPA 609 Cert

\* Future plans for Ground Support Refrigeration Training EPA 608 Cert  
- Welding and Metal Fabrication

- Power Industrial Truck or Fork Lift Safety and Operations, OSHA Cert  
Equipment Inspector and Classification FLMS (Maintenance and Supply)

### **San Antonio Refurbishment Center**

**(SARC)** Provides Hands on Training maintenance refurbishment opportunities on wheeled vehicles, trailers and pumps, as well as, welding and metal fabrication training.
